UX/UI designer passionate about creating accessible, user-centered digital experiences. I observe how people interact with products in real life and design solutions that make those experiences flow naturally. With a background in hospitality and a focus on UX research and accessibility, I bring empathy and attention to detail to every project.

I understand HTML, CSS, and JavaScript, which helps me collaborate effectively with developers and leverage AI tools to rapidly prototype ideas. This bridge between design and technology means I create solutions that are both user-friendly and feasible to build.
